### The Most Affordable and Easiest to Use Pawn Shop Software

The independent pawn shop owner has unique business software needs and before now their choices to fill those business needs with software were limited to products designed for the larger chain stores. Those products usually included many features they didn't need but had to pay for anyway. Also they frequently included costly annual licensing and support fees, fees that did not fit into the budget of a startup or mid-size pawn shop. We built our product from the ground up for Microsoft Windows® operating systems. We are time tested and proven in pawn shops across the country since 2002. Our new Pawn Wizard Deluxe 2009 is shipping now and has support for the newest Microsoft Windows® operating systems. We are the first and currently the only pawn shop software with support for both Microsoft Vista® & Windows 7® 32bit & 64 bit operating systems! Our California Pawn Wizard Deluxe 2009 version is now available which gives us users in 43 states, Canada & Puerto Rico, a tremendous record of growth in 8 years. We are THE ONLY Pawn Software company with enough confidence in their product to offer a satisfaction guarantee (double click the Guarantee logo for details)

Read on to the next page and see all the features we have built in as standard to Pawn Wizard.
